N. Y. JAZZ KING SOUGHT HERE IN DEATH OF MODEL

Merely Question Him, Is Request to Police.

New York, March 20.—The arm of the law, seeking the murderer of Dorothy King Keenan, who called herself a model, reached out tonight to Chicago for Jack Lannigan, another of her close friends and erstwhile proprietor of two Broadway jazz palaces.

The police do not want to arrest Lannigan, but to ask him, said Inspector Coughlin, about a report that he left for Chicago three weeks ago after a quarrel with her. If Lannigan doesn't care to appear in New York he will be asked to tell his story to Chicago police, said the inspector.

Lannigan was said to be living in North Clark street, Chicago, Cough-

Lannigan was said to be living in North Clark street, Chicago. Coughlin has asked the Chicago polics to try to persuade Lannigan to return to this city of his own volition.

Several Suspects Hunted.

A half dozen other men, taken into custody some time ago on suspicion of blackmailing and later released, also are wanted, the inspector said, to tell what they know about a proposal some one made to Miss Keenan to get "Mr. Marshall," the mysterious, yet unsuspecting, provider, into a position where to extort money from him in great wads would be easy.

"Mr. Marshall" was so infatuated with the woman, to whom he had given about \$10,000 in cash and more in jew-ciry within the year of their acquaintance, that he desired to divorce his wife and take Miss Keenan to Paris and marry her, Mrs. Keenan, the mother, told the district attorney's

office today.

Mrs. Keenan described "Marshall"
as a man about 60 years of age, 5 feet 6
inches in height, with white hair, blue
eyes, stockily built, and "refined and
with English manners."

She said that when she went to the apariment to view her daughter's body a pair of "Marshall's" pajamas were in the bedroom.

When the dead woman's safety de-

posit box was opened today three pieces of diamond set jewelry and \$2, 500 in Liberty bonds were found. The absence of the remainder of her jewelry confirmed the police theory that the slayer stole the gems Miss Keenar was reported to have worn the night of the murder, but whether the theft was an incident or motive of the murder.

The New Vogue in Jurs

Shayne offers direct importations by Molyneux of Paris—modes that authoritatively predict the fashions in furs for Spring and Summer.

The original models with their foreign labels intact are presented—from which, if desired, other coats may be fashioned in other furs. In these concepts, the ingenious Jacquette and Trotteur effects reach a climax in artistic designing.

Exhibited are clever Jacquettes of Ermine—beautiful, inimitable Ermine, in beige, brown or white. Trotteur coats of Baranduki (Russian Chipmunk) or Caracul in smart shades of caramel, platinum, beige, brown, black and white. Mole, too, in distinctive effects—in black, brown and natural. Also Jacquettes of squirrel—natural gray or mink dyed.

This is a collection of new furs that deserves the attention of those women who seek the very utmost in furs.

It is realized that the passive resistance in the occupied territory is doing Germany infinitely more harm than Prance. To maintain it has already strained the resources of the state almost to the breaking point, and there is doubt in some German minds whether it can continue much longer with the same success.

Indeed, Berlin has indicated to government officials in the Rhineland that without incurring its displeasure they may cooperate to some extent with the invaders. The oberpresident of the Westphalian district, which includes the cities of Dortmund and Bochum, has informed his subordinates there that they may negotiate with the Prenchmen regarding requisitions, the use of public property, and the possibility of continuing their offices without undue interference.

At Dusseldorf the Germans have resumed the administration of their prisons which today are largely occupied by prisoners sentenced by French courts martial. A month ago the religion's personnel refused to continue were incarcerated by foreigners.

At Walthrop the miners have decied not to oppose by strike the requisitioning of coal for the use of the French troops.

From ox and calf: Heart, kidney, spicen, lungs, brain, thymus, pancreas [sweetbreads], trips and blood.
From sheep and lamb: Heart, liver, brain and lungs.
Cooking liver, heart and kidney reduced their vitamines considerably. A T this season of the year a good many people have aches and pains the nature of which they do not understand and the cause of which they do not know. Many of these people kind of sease the notion that these vague disorders are due to the food of the winter months or something else connected with winter customs and habits.

habita.

There is a possibility that many of these nerve pains are mild manifestations of beribert (or would it be better to say a tendency "beribertward"?) and that these cases, like palpable beribert, get well when the diet is changed. It is now known that beribert is due to prolonged eating of a diet that is very poor in the antiscuritio viturains. The people who suffer most from beribert live on polished rice, exclusive diet of bread made from white flour would cause the same disease.

white flour would cause the same disease.

In recept months it has apparently been proven that the antiberiberi or the antineuritic vitamine, as it is usually called, is the same as Vitamine B, the water soluble growth vitamine. Perhaps this is the reason that the peoples who suffer most from beriberi are low in stature, in fact are quite "sawed off." Perhaps this is also the reason for the fact discovered by Porter of Harvard that the rate of growth of children is very low in March, April and May, the season in which there is most of these vague spring pains. So much by way of vague spring pains. So much by way of

rambling speculation.

Ralph Hoagiand of the United States bureau of animal industry has been piling up some very definite facts as to the amount of this water soluble growth principle called Vitamine B, and also called the antineuritic vitamine.

His research was to discover how much too easy. Nothing lean meat of beef, mutton, and pork could be more obvious. I and in the edible organs of cows, sheep and how much of this principle was destroyed by ordinary cooking.

As to lean meats, he concluded that beef, mutton and pork all contained considerable of it. He ranked hog meat the contained considerable of it. These conclusions relate to Vitamine B. They have no bear-

ing on any other nutritional quality of the meat. Baking a tenderion did not decrease
its content of the vitamine.
On the other hand, cooking a ham reduced the content of Vitamine B about
15 per cent. A slice of raw ham five square inches in size yields as much

Mrs. R. G. F. writes: My husband has developed a sinus in his back. Will you please tell me what causes a sinus? He has recently had seven boils due to poisonous goess. Would the sinus come from the same reason?

Also will the opening ever heal up?

Would heavy lifting or strain affect the sinuses? CAUSE OF SINUS.

The probability is that a tubercular infec-tion of a bone or joint is responsible for the sinus. It will not heal until the infected tissue at the bottom of the sinus is removed by operation or comes away otherwise. Sinuses are cured by operation, by bismuth injection and by light therapy.

Every American has Thirty Servants

"Modern nations expend far more energy than the combined muscular ability of their populations and beasts of burden. The margin is covered by the employment of mechanical energy in the form of power. The use of power gives to each man, woman and child in this country the service equivalent of 30 servants."

THE above quotation from a recent bulletin I of the Smithsonian Institution at Washington (the United States National Museum), gives some idea of the importance of mechanical power in modern civilization. Railroads, steamships, trolley lines, the factories which make practically everything we eat, wear or use -all are operated by mechanical power.

Over seventeen billion, four hundred million dollars (\$17,400,000,000) is invested in the railroads of this country, over five billion dollars (\$5,000,000,000) in trolley lines and other forms of electric transportation, over four billion, six hundred million dollars (\$4,600,000,000) in electric light and power plants, over three and a half billion dollars (\$3,500,000,000) in the steel industry, over one billion, one hundred million dollars (\$1,100,000,000) in the meat packing business and so on.

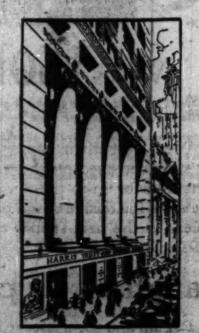

This remarkable development has been made possible through the confidence of American investors in sound business enterprises.

Something entirely new to drink

This package contains a new kind of home drink. It is malted milk richly flavored with chocolate.

Most people are thoroughly familiar with the health value of malted milk. This new chocolate kind contains the same vital food elements, but it is vastly improved with the addition of the chocolate flavor.

Just mix it with milk and you have a wonderful health drink, as delicious as it is nourishing.

If you have been in the habit of getting chocolate malted milk at the soda fountain, you will be delighted with this. Both are Borden's, made by the largest producer of milk products in the world.

H. G. Wells picks out the ten most important books

WHAT are the ten most important books in the world?

You may agree with H.G. Wells'answer to that question, and you may not. One thing is certain. You will be tremendously interested.

For Wells has courage. He refuses to think with the crowd. In The American Magazine for April, now on sale, he names ten books and defends his choice.

STHE Bible a book? Is Shakespeare? Was I Karl Marx a force for good or for evil, and ought he to be on the list, anyway?

The answers Wells gives to these questions will astonish you.

What book sent Columbus to America?

What writer said first (in 1781) that we

can reconstruct the world only by remaking it in our children's schools—that in better education lies our surest, freshest hope?

Of one of the books he selects, Wells says: "It is the most liberating book in the world, full of the faith that man can make his life and future what he will."

For eight years now, The American Magazine has been full of this faith. In those eight years, we who buy it every month have grown in numbers from 400,000 to more than 1,900,000.

Reading it we feel richer, and this feeling endures when we lay it down. Of all magazines, it seems to be most full of the greatness, the danger and the beauty, the limitless opportunities, of what Wells superbly calls:

"The endless adventure of life."

WISCONSIN GUNS AGAIN TURNED ON

NATIONAL GUARD

Madison, Wis., March 20.—[By the Associated Press.] — The Wisconsin

ciated Press.] — The Wisconsin bill, mid. National Guard received a second blow from the legislature today when the assembly voted, 44 to 21, to terminate state aid for maintenance of armories and to turn over the eight state owned armories to the cities in which they are located for school and other purposes. This stand was taken by assemblyman Jehn Polakowski, Milwaukee, Socialist, author of the proposal to abolish the National Guard, which passed the assembly.

Filled in a Jiffy! -with a sealed cartridge of fresh liquid ink

CODAY at the best dealers there is waiting for you a pen that ends at last all the writing troubles you ever experienced.

It is the John Hancock Cartridge Pen -"Cartridge" because it fills in a brand new way, with a sealed cartridge of fresh liquid ink.

Simplicity itself: you unscrew the back cap, insert the cartridge, screw it up firmly (one turn does it) and replace the cap. Filled, in a jiffy, for about a month or more of writing.

Convenience and cleanliness beyond anything you ever thought possible.

It ends muzzle loading, ink squirting, ink sucking, smeared fingers and mopping up.

It frees you of the uncertainty of ink picked

carried in your pocket or bag-fresh, clean, always ready.

It gives you a pen always ready to write—willing, efficient, obedient.

But the John Hancock Cartridge Pen gives you more than freedom from annoyance.

It is the last word in writing convenience.

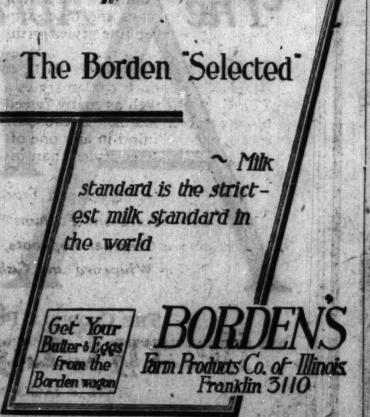

The perfection of the cartridge principle makes it so. All the ink is delivered to the point in an even, precise flow as needed. .

Go to any good dealer's and try the John Hancock Cartridge Pen for yourself-today. You will find it is the smoothest, surest writer you ever had in your hand.

are you getting out of the Philadelphia Trading Area

-the richest territory in the United States?

THE Philadelphia Trading Area is a unique market presenting untold opportunities to national advertisers. Here is a wonderful territory. At its core a huge metropolis-the City of Philadelphia, the heart of a section rich in the products of the mine, mill, factory and farm.

Radiating in all directions are charming suburbs and hundreds of prosperous and long-established small towns. Towns where virtually every family owns its home, where the proportion of homeowners is greater than in the Big City, and where the people logically turn to Philadelphia as their shopping center.

In This Trading Area of 5,500,000 People No Newspaper Approaches the Powerful Influence Exercised by

THE NORTH AMERICAN

No Philadelphia newspaper or combination of newspapers reaches many of the homes where THE NORTH AMERICAN enters daily, bringing the advertiser's message to families who possess the greatest buying power of this rich market.

Such is the big Philadelphia Trading Area which beckons to advertisers. A Greater Community bound together by high-speed electric cars, railways, automobiles, telephones and excellent roads—the Richest Territory in the United States.

THE NORTH AMERICAN is 85 per cent home delivered. Every day six out of every seven copies go directly into the homes of substantial families who have the taste and the ability to demand the best of everything. Thousands of THE NORTH AMERICAN readers own automobiles; tens of thousands maintain charge accounts in Philadelphia stores; most of them own their own homes.

The advertiser who hopes to get a big slice of the Philadelphia Trading Area business should remember:

First, that THE NORTH AMERICAN is a newspaper built on the bedrock of confidence. Its accumulated prestige and generations of Reader Dependence account for the tremendous pull of its advertising columns.

Second, that people who represent the wealth and stability of the Philadelphia Trading Area and who possess the means to buy the things you sell can best be reached through their trusted newspaper—THE NORTH AMERICAN.

Finally, remember that THE NORTH AMERICAN readers are ready to buy—let them know you are ready to sell! Broadcast your message through the one newspaper where you can get maximum results at a minimum cost—THE NORTH AMERICAN.

Lift a Piano to the Top of Washington Monument

And you do just a little more work than the elevating machinery of a cement plant does in the course of nanufacturing a barrel of portland cement.

In a typical plant, the materials for a 376-pound barrel of cement-which weigh more than twice that to start with-have to be elevated fifteen times to heights ranging from 20 to 90 feet in going through the more than eighty operations between raw materials and finished product.

Practically all of this lifting and carrying is nowadays done by mechanical conveyors. Many of these are very ingenious.

They may be endless chains of moving buckets that go trailing all about the plant, picking up and dropping different loads two or three times in the course of their journey. They may be wide belts.
Or they may be huge "corkscrews" fitting snugly inside steeltubes and pulling the materials
along as they turn.

One of these corkscrews may be 100 feet long; one of the belts a quarter of a mile long.

In a medium sized plant—one with a million barrels capacity a year—an investment of more than a quarter of a million dollars is necessary for machinery that does nothing but carry and lift.

Conveying and elevating are among the great variety of operations in cement making.

Your Attorney Will Tell You

Your attorney will tell that imposing the administration of your estate upon a friend is unfair-both to your friend and to your heirs. Appointing a trust company as executor and trustee under your will is the course of wisdom. Individuals die, they change their place of residence-often they lack experience, and they make mistakes.

Our trust officers will be glad to consult with you without any obligation on your part.

Poujol's Jasmin perfume, \$2 oz.-

A new importation of this popular odor, at an attractive selling price.

500 women's and misses' springtime frocks and suits for Easter in a one-price sale of extraordinary merit

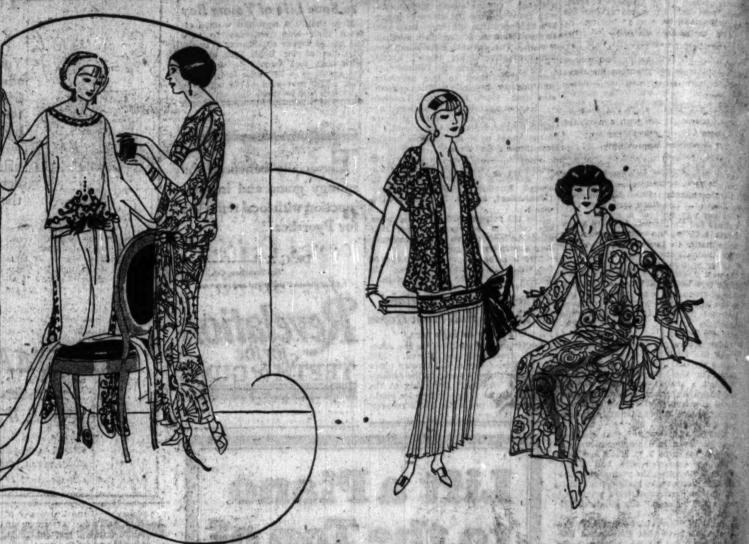

Just the sort of frocks and suits you will want for "the Easter parade"—tasteful in tailoring, fine in fabric, smart in style—and as freshly "new" as the spring.

The slender spring silhouette is pleasingly characteristic of these frocks and suits. And the values, remarkable in the extreme, are the result of expert buying.

Tailleurs of twill cord, \$55 in tan, graystone. velour and covert, black

Trigly tailored, box coat, wrap around and tie-at-side styles in this collection show cleverly distinctive touches of tucking, silk stitching, as well as ribbon adornment. Two women's models are to be seen pictured at the left; two misses' models at the right.

Frocks of flat crepe, \$55 satin canton crepe, canton, georgette, 55 figured chiffons

They are lustrous with novel tinsel embroidery, silk stitching, beading, braiding. Motifs of Egyptian and oriental conception have been evolved into picturesque printed patterns for trim or fabric. Above, at the left, are sketched two women's models, and, at the right, two misses.

Pre-Easter sale of smart hats

Tis high time for madam and miss in the mode to select "the" Easter hat. This is the most fascinating collection of distinguished hats in latest designs and colors—and decidedly uncommon values, you will agree.

Hats of milan, of felt,

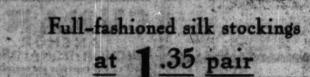

3.75 With emb'y, burnt goose, ribbons, flowers, feathers

Stunning are these new, Paris-sponsored shapes and shades, smart are these hats for wear on Easter Sunday and throughout the season. Three fetching styles are sketched.

Full-fashioned silk hosiery

Special purchases make possible the unusual values. The stockings are perfect in every detail, and will give satisfactory service.

They are in several weights and in spring colors.

Thread silk hosiery, medium weight; double hemmed cotton garter top and reinforced toes, heels and soles of fine cotton. Black only. Sizes 8½ to 10.

What made the March hare mad?

Whose-Wee! This certainly is a rushing season for the snewy white Easter rabbit! It behooves him to wingle his whiskers and go like the wind—what with Easter coming on apace and this new rage for white fur sport costs! That sport costs absuld be of soft white fur seems quite, quite mad—and yet you've no idea how jolly looking they are. Very white, very brief, very new—they come in rabbit akin, white caracul, ermine and some of them trimmed with black monkers for.

Putting them all in the shade!

That's what this person does to all other sunshades! A person parasol it is — for not only is a feminine weapon against Sol the sun god, but it is also a gay challenge to Jupiter Pluvins, the god of storas. And since we are getting down to sun, rain and characteristic facts, here is the place to say that this parasol is made of rubberized wilk is a Person Painley pattern. King Tut, and all good Egyptians, believed in reincarnation. Their gods were always represented in the forms of birds and animals; designs of them are exquisitely beaded in color on these bags.

There are, also, beaded images of King Tut, himself, and Mrs. Tut. All the bags are framed in beautiful shell mountings, are full silk lined and fringe-finished. See the sketch.

Superba one-strap slippers of black satin or patent leather

For afternoon or evening wear, these slippers are the very thing. They are made with that careful attention to detail that characterizes all Superba footwear.

Excellent values, indeed,

Tell Hoover About Mixup in Broadcasting.

Washington, D. C. March 20 .- Radio experts and government officials con-cerned in its extension met here at the call of Secretary Hoover to con the call of Secretary Hoover to consider various problems, particularly
with a view to eliminating interference in broadcasting to the public.
After preliminary presentation of
views by the government representatives, officials of radio associations,
manufacturers, and broadcasting station operators, and conferees went
into executive committee sessions for
consideration of a new scheme of allocating bands of wave lengths.

There are thousands of Janets. You find them in the prim New England downs, in New York, in Chicago, in every eastern and western state. They sit and sigh in lonely hall bedrooms, in homes of luxury even. You see their tired, dispirited faces in the subways, elevated, buses, and street cars after the day's work is done. You see them pouring out of factories, school buildings, offices—wage earning, independent in everything except the thing that is nearest the heart—a life of love and companionship.

Fatalists in regard to the career of marriage are they. It either happens or it doesn't is their principle. Ye were never thought unattainable.

Seaboard Air Line Railway Company

Equipment Trust, Series "V"

6% Equipment Trust Gold Certificates To Be Issued Under the Philadelphia Plan

Principal and dividends to be unconditionally guaranteed by the Seaboard Air Line Railway Company by endorsement on each certificate

THE CHASE NATIONAL BANK OF THE CITY OF NEW YORK, TRUSTEE

To be dated April 1, 1923. Payable semi-annually, in serial installments, October 1, 1923, to April 1, 1935, both inclusive.

Payable to bearer (with optional registration as to principal) in denomination of \$1,000. At the option of the

Seaboard Air Line Railway Company certificates are to be paid without deduction of Normal Federal

Income Tax not in excess of 2% per annum. Certificates and dividend warrants (April 1 and

October 1) payable at the office of the Trustee.

Mr. S. Davies Warfield, President of the Seaboard Air Line Railway Company, summarizes his letter to us as follows:

These certificates are to be issued in part payment for Standard Railway Equipment, consisting of

1.000 New Steel Underframe Ventilated Box Cars, 80,000 pounds capacity. 1,000 New Steel Underframe Gondola Cars, 100,000 pounds capacity.

25 New Steel Underframe Caboose Cars. 4 New All Steel Mail and Baggage Cars.

20 New Mikado Type Freight Locomotives with Boosters. 1,100 Rebuilt Steel Underframe, Steel Upperframe, Ventilated Box Cars. 500 Rebuilt Steel Center Sill, Reinforced Ends, Ventilated Box Cars. 400 Rebuilt Steel Underframe Hopper Bottom Gondola Cars.

The value of this equipment taking into consideration actual cost of the new equipment and a minimum valuation of the rebuilt equipment by Messrs. Ford, Bacon & Davis, Inc., is \$8,950,000, giving a present equity in this trust of \$2,350,000 or over 35%, in excess of the face value of these certificates.

The title to the equipment is to be vested in the Trustee under lease to the Seaboard Air Line Railway Company at a rental sufficient to pay these certificates and the dividend warrants and other charges as they become due.

Seaboard Air Line Railway Company will unconditionally guarantee by indorsement on each certificate the prompt payment of the principal and dividends of these certificates.

With the additional freight cars to be presently acquired or rebuilt from the proceeds of the present issue, with approximately 3,000 new cars recently purchased and now delivered, and 7,100 cars rebuilt (nearly all delivered) and the early completion of the present program of rehabilitation in the company's own shops, the new or rebuilt cars under the standardized plans and methods adopted by the company will approximate eighty per cent (80%) of the car ownership of this railroad.

The present average per diem freight car loadings are the greatest in the history of this railroad. The gross revenue for January, 1923, was \$4,487,730, or \$899,160 over January, 1922; for February, 1923, is estimated at \$4,567,726, or \$1,158,480 over February, 1922.

Securities - the Need

VERY MAN earns more or produces more than his actual immediate needs during most of his life.

The prudent man endeavors to accumulate or utilize some part of this surplus to better his condition, to use in emergencies and to provide against the time when his earning powers decline.

This instinct is a race inheritance. It is one of the basic factors of civilization itselfan essential of all progress.

Accumulation of wealth has been practiced from the dawn of time; utilization of these surplus funds as a source of income or profit is a comparatively recent development. Until a few hundred years ago, the property rights of the individual were few and uncertain.

The ordinary person had to protect his accumulated property by stealth or force. If he had wealth he concealed it, for displayed possessions were an invitation to predatory kings, nobles and government officials to say nothing of bandits and other unofficial robbers.

Under such conditions, large business could not exist-did not exist-except for the very few enterprises financed by kings or powerful noblemen.

A queen had to pawn her jewels to finance Columbus in his venture—the most profitable business speculation ever undertaken.

Now the development of securities and exchanges has brought together the surplus funds of the thrifty and the worthy enterprise which requires capital.

For more than a century the New York Curb market, as one of its important functions, has provided a primary market for the securities of companies in the formative period of their corporate existence—an impressive assemblage of great enterprises.

Growing with the need for financing the nation's marvelous industrial progress, it is now America's second largest stock market.

And Jones & Baker, who offer brokerage service exclusively in New York Curb Exchange securities, have kept pace with this growth. Realizing that the best safeguard of the investor and trader is information. they have developed facilities which make them widely known as "information headquarters" on these securities.

It is significant that nearly 40% of their new customers come from old customers.

The Salina Light, Power and Gas Company, a Kansas corporation, operates without competition in the City of Salina, Kansas, serving a population of about 17,000. The Company supplies gas, electric light and power. Salina is the county seat of Saline County which is located in the east central part of the state. The City is an important distributing point and flour milling center for a rich and progressive

From the letter of Mr. R. E. Burger, President of the Company, we have selected the following points which are of especial interest:

Security: These bonds represent the only funded debt of the Company. They are secured by a first mortgage on all of its property, valued by independent engineers at largely in excess of total bonded debt.

Earnings: The net earnings of the Company for the year ended January 31, 1923, applicable to interest charges and after taxes and maintenance were \$208,918.48, (total annual bond interest is only \$57,000), or over three and one-half times bond interest requirements.

Mortgage Provisions: Additional bonds may be issued for 80% of additional improvements and extensions, provided the net earnings, as defined in the mortgage, are equivalent to twice

the annual interest charges on bonds outstanding and those then to be issued.

Maintenance Fund: The Company covenants to expend 10% of its gross earnings per annum for maintenance. This would be equivalent to \$50,748 in 1922.

Sinking Fund: The Company agrees to set aside a certain sum of money each year for the purchase or retirement of bonds, or for additional improvements or extensions against which no bonds may be issued.

Management: The Company is assured of efficient and progressive management through its close affiliation with Henry L. Doherty & Company, well known public utility operators.

These bonds are offered for delivery when, as and if issued and accepted by us, and subject to the approval of legality counsel, Messrs. Chapman, Cutler & Parker, Chicago. Appraisals of the properties have been made by Edward P. Sn ago, and Jackson and Moreland, Boston. The books of the Company have been audited by Arthur Andersen & Comp

First Mortgage Fifteen-Year 7% Sinking Fund Gold Bonds

Dated February 1, 1923 Due February 1, 1938

Details of this issue are given in the President's letter, which will be sent on request. From this letter it will be noted that:

BUSINESS: The Company manufactures and distributes over 98 different chemical products-lubricants, soaps, polishes, varnishes, etc.-chiefly for automobile and household use, and is the only company in the United States which manufactures as large and varied a line of this type.

SECURITY: The bonds will be secured by a direct first mortgage on all the fixed assets of the Company. The halance sheet of December 31, 1922, as prepared by Messrs. Ernst & Ernst, including this financing, shows net tangible assets equal to over \$3,400 and net current assets equal to about \$2,100 for each \$1,000 bond of this issue.

EARNINGS in 1922, before taxes, were over 8 times the interest requirements on this issue, and in the past seven years they have averaged over 41/2 times these requirements. In the 32 years that the Company has been in business it has always earned a profit.

UNUSUAL POSITIONS IN SALES WORK FOR COLLEGE WOMEN

OF PLEASING PERSONALITY, NEAT APPEARANCE.

Seldom does one find an opportunity such as this, where the association of the other refined young women, a large majority of whom are college trained, may be had, combined with exceptional earning possibilities which are governed only by the ability to absorb and present knowledge in a convincing manner.

You need not have any previous business experience to quality; how ever, if your college work included such subjects as salesmanship, commerce, marketing, sociology or applied paychology, you should be interested in one of these positions. The salary is not large to start, but after you have received a thorough training you should earn on an average of \$35 to \$40 a week. More than 10 young women averaged that amount last week. Aggressiveness and a determination to carry through to a successful con-clusion whatever is undertaken are desirable qualifications
